

ACVATIX™

Rotary actuators for ball valves

GDB..9E..

Electromotoric rotary actuators for open-close, three-position or modulating control. Used in heating, ventilation and air conditioning plants.

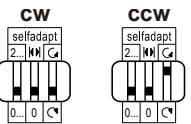

- For 2-port and 3-port control ball valves, internally threaded connections (VAI61.. and VBI61..) or externally threaded connections (VAG61.. and VBG61..), DN15 to DN25
- For open/close ball valves 2-port and changeover ball valves 3-port, internally threaded connections (VAI60.. and VBI60..) or externally threaded connections (VAG60.. and VBG60..), DN15 to DN25
- Nominal torque 5 Nm
- Operating voltage GDB141.9E and GDB161.9E AC 24 V ~ / DC 24...48 V =
- Operating voltage GDB341.9E AC 100...240 V ~
- Operating voltage GDB161.9E/MO AC 24 V ~ / DC 24 V =
- Positioning signal DC 0/2...10 V =
- GDB161.9E/MO: RS-485 for Modbus RTU communication
- Pre-wired with 0.9 m long connection cables

Features

- Brushless, robust DC motors ensure reliable operation regardless of load.
- The rotary actuators do not require an end position switch, are overload proof, and remain in place upon reaching the end stop.
- The gears are maintenance free and low noise.
- Suitable for use with modulating controllers (DC 0/2...10 V), open-close or three-position controllers.
- We recommend a minimum pulse length of 500 ms on rotary actuators operated with 3-point control to ensure continuous and accurate operation.

Functions

	AC 24 V ~ / DC 24...48 V =	141.9E	161.9E	—
GDB..	AC 24 V ~ / DC 24 V =	—	—	161.9E/MO
	AC 100...240 V ~	341.9E	—	—
	Control type	Open-close / three-position	Modulating control (0/2...10 V)	Modbus RTU
Rotary direction	<p>Clockwise (cw) or counter-clockwise (ccw) direction depends on the type of control. With no power applied, the actuator remains in the respective position. ... on the setting of the rotary direction DIL switch</p>  <p><small>GD.1.E.206</small></p>	<p>... on the setting of the rotary direction DIL switch</p>  <p><small>GD.1.ERW_208</small></p> <p>... on the positioning signal The actuator remains in the achieved position: ... if the control signal is maintained at a constant value ... for loss of operating voltage.</p>	— —	—
Combination with 2-port or 3-port control ball valves	NC (normally closed) ball valve	NC (normally closed) ball valve	—	—
	<p>Basic setting: Y1: Opening Y2: Closing</p>  <p><small>GD.1.E.207</small></p>	Basic setting: Y1: Opening Y2: Closing	—	—
	NO (normally open) ball valve	NO (normally open) ball valve	—	—
	<p>Basic setting: Y1: Closing Y2: Opening</p>  <p><small>GD.1.E.208</small></p>	Basic setting: Y1: Closing Y2: Opening	—	—
	Position indication: Mechanical	Rotary angle position indication by a position indicator/hand lever.		
Position indication: Electrical		<p>Output voltage U = DC 0/2...10 V is generated proportional to the rotary angle. U depends on the rotary direction of the DIL switch setting.</p>		
Self-adaptation of linear span		When self-adaptation is active, the actuator automatically determines the mechanical end positions of the linear span.		
Manual adjustment	The rotary actuator can be manually adjusted by pressing the gear train disengagement button.			

	AC 24 V ~ / DC 24...48 V =	141.9E	161.9E	—
GDB..	AC 24 V ~ / DC 24 V =	—	—	161.9E/MO
	AC 100...240 V ~	341.9E	—	—
Rotary angle limitation	The rotary angle of the shaft adapter can be limited mechanically with a set screw.			
Modbus RTU (RS-485), not galvanically isolated				Setpoint 0...100 % valve position Actual value 0...100 % for valve position Override control Open / Close / Min / Max / Stop Setpoint monitoring and backup mode

Technical design/mechanical design

Housing

The housing consists essentially of flame retardant, non brominated, non chlorinated glass fibre reinforced plastic.

Type summary

Type	Stock no.	Control	Operating voltage	Position indicator U = DC 0...10 V =	Self-adaption of rotational angle range	Aux. switches	Rotary direction switch	
GDB141.9E	S55499-D200	Open-close or three-position	AC 24 V ~ / DC 24...48 V =	—	—	—	yes	
GDB341.9E	S55499-D201		AC 100...240 V ~					
GDB161.9E	S55499-D275	Modulating	AC 24 V ~ / DC 24...48 V =	yes	yes	—		
GDB161.9E/MO	S55499-D682	Modbus RTU	AC 24 V ~ / DC 24 V =					

Accessories / Spare parts

Spare parts

Individual spare parts are not available. Components of the accessory kit ASK77.3¹⁾, available as an accessory, can however be used for spare parts.

Description	Components
ASK77.3 Accessory Kit BV for GxBxx1.9E	Mounting bracket (base plate) Axe with sleeve and spring Manual lever with locking clip

¹⁾ Can also be used as rotary actuator for ball valves together with the actuator for air dampers G..B.1E.

Safety

	Caution National safety regulations Failure to comply with national safety regulations may result in personal injury and property damage. <ul style="list-style-type: none"> • Observe national provisions and comply with the appropriate safety regulations. • Use only properly trained technicians for mounting, commissioning, and servicing.
---	---

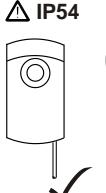

Mounting

Both ball valve and rotary actuator can easily be assembled at the mounting location. Neither special tools nor adjustments are required.

Orientation

4716216
Cables must be easily accessible

Protection against weather, humidity and dirt

 GSB_14_207	 IP54 4716216	 3542250	 3542250
Protection against direct sunlight and rain	Correct mounting position and cable connection		Protection only with closed cover!

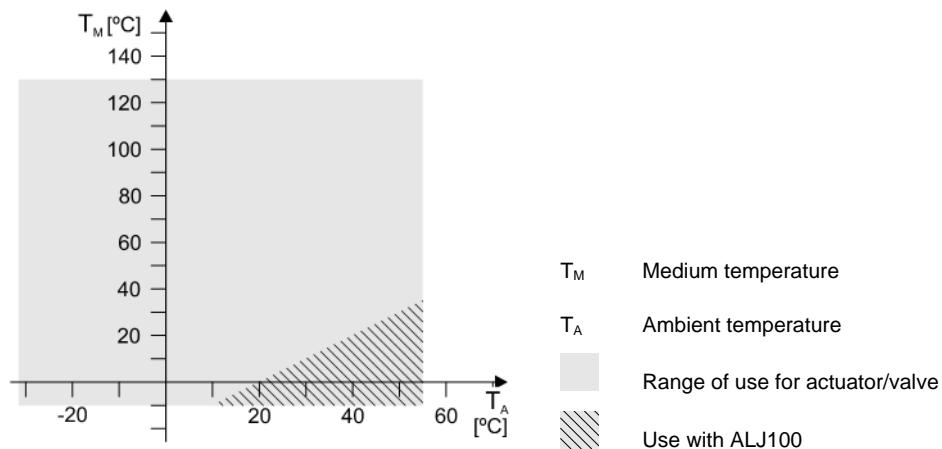

Installation

	WARNING No internal line protection for supply lines to external consumers Risk of fire and injury due to short-circuits <ul style="list-style-type: none"> • Adapt the line diameters as per local regulations to the rated value of the installed fuse.
---	---

Engineering

GDB..9E.. actuators may only be used at medium temperatures $> 0^{\circ}\text{C}$.

If condensation occurs at the mounting site, the use of the temperature adapter ALJ100 is recommended in order to protect the actuator. If the medium temperature is $\leq 0^{\circ}\text{C}$, the adapter shaft must be greased with silicon grease.

GDB161.9E/MO

The Modbus converter is designed for analog control at 0...10 V.

Commissioning

When commissioning the system, check wiring and the functions of the rotary actuator.

Manual adjustment

The rotary actuator can be manually adjusted into any position between 0° and 90° by pushing the gear train disengagement slider.

If a control signal from the controller is present, this will take priority in determining the position after the slider is released.

For manual adjustment: Power off!

Maintenance

The actuators GDB..9E.. are maintenance-free.

Disposal

The device is considered electrical and electronic equipment for disposal in terms of the applicable European Directive and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

Technical data

Power supply GDB1..9E..
